F.P.T. / MANUFACTURER FOR OVER 50 YEARS

MANUFACTURING PLANT

F.P.T.

MANUFACTURING PLANT

F.P.T. / THE HIGH PRESSURE EXPERTS

3 MANUFACTURING PLANTS

Relying on F.P.T. means choosing technical solutions deriving from more than 50 years of experience in the field of hydraulics. It means utilising functional and modern technology that simplifies and improves the level of your work. It means receiving personalised service that meets your specific requirements and satisfies all needs.

From 700 to 4.000 bar. For years F.P.T. supplies the international marketplace with a complete line of highpressure hydraulic tools and equipment.

F.P.T. manufactures, assembles and tests, in company-owned facilities in Italy, a wide

range of standard products, with ample warehouse availability, that make an operator's work easier and increase efficiency in various industrial sectors.

With a profound tradition in constant evolution, highly specialised engineering and design expertise focused on developing new technical solutions, absolute quality products as well as efficient technical and after-sales service and assistance, F.P.T. has become the recognised reference in high-pressure hydraulic systems personalised to meet customers' requirements.

F.P.T. / DESIGN AND PRODUCTION

**MADE IN
ITALY**

There is only one way that allows F.P.T. to meet the needs of its customers with products able to improve their work: aiming to perfection and always seeking for the maximum benefit for the customer.

**MADE IN
EUROPE**

F.P.T. follows the strategy of the highest quality: designs, produces, assembles and tests all its products at its Italian factory and guarantees excellence in all performance, from the smallest cylinder to the most complex lifting systems.

DESIGN

Possible inspection and study of feasibility at the customer's facility: search for the best solution for every need.

The highest quality achievement starts from the engineering phase, where new designs are constantly addressed to fulfil the technical needs of the markets of reference.

PRODUCTION

Possible inspection and study of feasibility at the customer's facility: search for the best solution for every need.

The highest quality achievement starts from the engineering phase, where new designs are constantly addressed to fulfil the technical needs of the markets of reference.

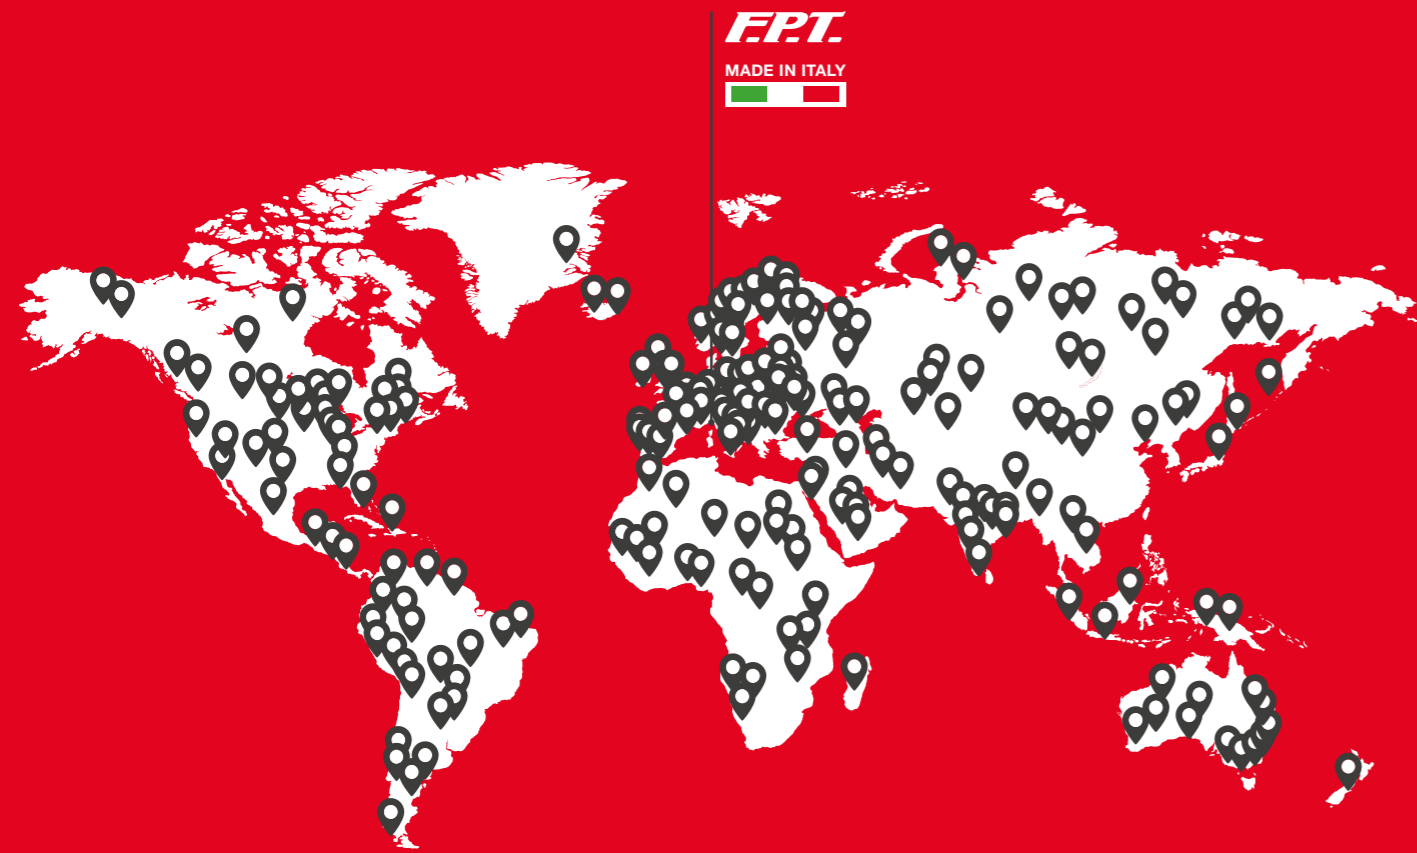

F.P.T. / PRODUCTION

FPT – Fluid Power Technology has the latest generation of CNC machine for turning and milling to manufacture all components that are assembled and tested in our facilities.

We are always ready to follow the customer in ambitious projects, producing complex components with advanced machines and technologies. Centesimal precision, boring, special manufacturing and dedicated pressure testing are our strength.

F.P.T. / ALL OVER THE WORLD

The F.P.T. products are being used everywhere in the world and in the most diversified industrial sectors. This equipment makes any lifting and handling operation of large objects, hydraulic tightening and structure's tensioning, safe and accurate.

F.P.T. / AT THE SERVICE OF CUSTOMERS

EVERYWHERE IN THE WHOLE WORLD

F.P.T. / CERTIFIED QUALITY

F.P.T. features its own test department and prototype department, where constantly studies to improve production and performance take place. A metrology room is dedicated for measurement and quality control.

All our products are CE certificated, with the Quality Management System and Management of Health and Safety at Work certified ISO 9001:2015 and ISO 45001:2018.

Therefore absolutely safe and compliant to quality guidelines: especially to those that make the customer always satisfied.

CE OF CONFORMITY

F.P.T. supplies a declaration of conformity for each product and the CE mark for the products that comply with the directives of the European Community.

F.P.T. / MANUFACTURERS OF

CUSTOM EQUIPMENT

The strength of F.P.T. lies in the ability to design and implement special equipment able to respond to the most specific customer's requests. A team of specialists follow the customer during the technical consulting phase, designing, production and installation of all equipment, evaluating the best technical solutions to achieve the personalization.

01

STANDARD PRODUCTS

WHEN THE STANDARD BECOMES REFERENCE.

F.P.T. produces a wide range of standard high pressure products from 700 to 4000 bar and supplies production, technical assistance and spare parts all over the world.

02

PRODUCTS ON REQUEST

PRODUCTION Custom made hydraulic equipment

The true distinctive character of F.P.T. lies in the design and production of costum made equipment, to meet any specific customers' need: from the smaller workshop to the largest production unit, there is no industrial sector that can do without the help of our products.

PRODUCTS ON REQUEST

PRODUCTION Custom lifting equipment

Hydraulic systems created by a team of specialists and engineers, who follows the customer in the phase of technical consulting, in the analysis of the project, in the design, production and implementation of all needs, evaluating the best technical solutions in a personalized manner.

PRODUCTS ON REQUEST

PRODUCTION Custom bolt tightening equipment

F.P.T. follows the customer from the study of the geometries, to the 3D project, up to the production of the required bolt tensioners and related bolting system.

F.P.T. / LIFTING EQUIPMENT

The strength of F.P.T. lies in the ability to design and implement special equipment able to respond to the most specific customer's requests. A team of specialists follow the customer during the technical consulting phase, designing, production and installation of all equipment, evaluating the best technical solutions to achieve the personalization.

F.P.T. / HYDRAULIC CYLINDERS

Hydraulic cylinders are a very important component of the hydraulic circuit. Entirely designed and manufactured by F.P.T. in various types they can be used in different fields of application. Type of cylinder and specific applications determine different constructive methodologies.

FOR HARSH ENVIRONMENTS ANTI-CORROSIVE TREATMENT - NITOX ONC

The NITOX - ONC treatment is the modern combination of proven NITREG® technology of nitriding gas with controlled potential and a subsequent stage of oxidation followed by a sealing process using a liquid inhibitor of corrosion. It gives the surface a uniform black color that increases the resistance to corrosion and wear. Salt spray test ASTM-B117 showed corrosion resistance of over 400 hours. High resistance to corrosion, wear and fatigue.

All models with a mass greater than 20 kg are equipped with lifting eyebolts.

Removable high-resistance head, possible tilting saddle for better distribution of the load to be lifted.

Exterior painting for maximum resistance to corrosion and/or Nitox ONC treatment.

Cylinders equipped with high strength seals for maximum durability over time: on request it is possible to equip the cylinder with high-strength gaskets for operative temperatures up to 200 ° C.

The guiding surfaces realized with double bronze ring are sized to guarantee optimal performance in load offset absorption and stop-ring increases safety for the operator avoiding the over stroke of the piston.

Equipped with a 3/8" NPT female coupler with dust cap.

CYLINDER'S CODIFICATION DESCRIPTION

The cylinder's coding table shows the various possibilities in the product line: type of cylinder, the choice of construction materials, the piston stroke, push or pulling capacity and accessories if any.

Series	Material ↑ A – ALUMINIUM S – STAINLESS STEEL	Stroke ↑ STROKE mm	Type

CSE – GRAVITY RETURN CRM – SPRING RETURN CRI-C – OIL RETURN CDE – DOUBLE ACTING		CAPACITY ↓ ton at 700 bars	GS – LOCK NUT XP – EXTRA FLAT FO – HOLLOW TRA – PULLING WITH EYELETS TR – PULLING C – COMPACT
			↑ TA – TILTING SADDLE FS – BALL JOINT

PRODUCT PAGE

The most versatile cylinder for various applications

CUSTOM CYLINDERS ON REQUEST

- Single acting cylinders with spring return, high pressure. Push force from 5 to 100 tons with range of strokes from 25 mm to 360 mm.
- Extremely versatile hydraulic cylinders, suitable for various application, for lifting, pressing and pushing.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption and stop-ring increases safety for the operator avoiding the over stroke of the piston.
- 3/8" NPT female coupler with dust cap equipped, fixing holes on the bottom surface and thread on external section of the body of the cylinder.
- Equipped with high strength gaskets for maximum durability.
- Removable high strength head and possibility of mounting a tilting saddle for better distribution of the load to be lifted.
- External painting and Nitox ONC treatment on all internal mechanical components for maximum resistance against corrosion and wear.
- All models weighing more than 20 kg are equipped with lifting eyebolts.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

When being compact is a must

CUSTOM CYLINDERS ON REQUEST

- Hydraulic cylinder, spring return, high pressure. Push force from 10 to 100 ton, stroke 50 mm.
- Lightweight, easy-to-handle cylinders with limited closed height.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption and stop-ring increases safety for the operator avoiding the over stroke of the piston.
- Equipped with high strength gaskets for maximum durability.
- 3/8" NPT female coupler with dust cap equipped.
- Non removable, high strength saddle, piston embedded.
- Nitox ONC treatment on all mechanical components for maximum resistance against corrosion and wear.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

Series **CRM-XP**

Extra flat, single acting cylinders with spring return

PRODUCT PAGE

Ideal for narrow and confined areas

CUSTOM CYLINDERS ON REQUEST

- Extra flat hydraulic cylinders, single acting, spring return, high pressure. Push force from 4,5 to 150 ton, range of strokes from 6 to 15 mm.
- Flat cylinders with extremely reduced closed height, ideal for working in narrow spaces where it would be impossible to use other cylinders.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption and stop ring increases safety for the operator avoiding the over stroke of the piston.
- Equipped with high-strength gaskets for maximum durability.
- 3/8" NPT female coupler with dust cap equipped.
- Non removable, high strength saddle, piston embedded.
- Nitox ONC treatment on all mechanical components for maximum resistance against corrosion and wear.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

Super extra flat hydraulic cylinders, load return, push force from 100 to 200 tons at 2.000 bar. Used when available height is really minimal, they are suitable for working in such small spaces where it would not be possible to use the CRM XP cylinders.

PRODUCT PAGE

Light weight easy to carry

CUSTOM CYLINDERS ON REQUEST

- Hydraulic cylinders, aluminium weight, single acting spring return, high pressure- Push force from 30 to 100 ton with range of strokes from 50 to 100 mm.
- Hydraulic cylinders made of high strength special aluminum alloy, light weight, easy to carry and very easy to handle. Used in applications in which reduced weight is an important factor.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption and stop-ring increases safety for the operator avoiding the over stroke of the piston.
- Equipped with high strength gaskets for maximum durability.
- 3/8" NPT female coupler with dust cap equipped.
- High strength saddle and possibility of mounting a tilting saddle for better distribution of the load to be lifted.
- The aluminum cylinders are different from those in steel and while offering advantages in terms of weight have a different behavior at fatigue. Hence the aluminum cylinder must not be used in intensive applications.
- All models feature carry handles.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

Different strokes and tonnages available.

Different models of aluminium cylinders available

- CSEA series, single acting cylinders, load return
- CSEAGS series, single acting cylinders, load return, with lock nut
- CRIA series, double acting cylinders, oil return
- CRMAFO series, single acting cylinders

PRODUCT PAGE

Pulling force: for structure approach operations

CUSTOM CYLINDERS ON REQUEST

- Single acting, pulling hydraulic cylinders with spring return, high pressure. Pushing force from 2 to 100 tons with range of strokes from 75 mm to 160 mm.
- Cylinders that operate under a pulling force. Ideal for load approach and welding operations in the shipbuilding and heavy structural steelwork sectors.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption and stop-ring increases safety for the operator avoiding the over stroke of the piston.
- Equipped with high strength gaskets for maximum durability.
- 3/8" NPT female coupler with dust cap equipped. CRM TR cylinders feature a threaded section on the body and piston to fit its accessories: chains, heads and extensions.
- External painting for maximum corrosion resistance or Nitox ONC treatment on all components for the maximum resistance to corrosion and wear.
- All models weighing more than 20 kg are equipped with lifting eyebolts.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

Cylinders for tensioning operations, maintenance and testing

CUSTOM CYLINDERS ON REQUEST

- Single acting hollow hydraulic cylinders with spring return, high pressure. Push force from 10 to 100 tons with range of strokes from 50 mm to 160 mm.
- Hydraulic cylinders with hollow center suitable for operations of tensioning, maintenance and testing; for cable tensioning operations, positioning bars in tensile structures, pulley assembly and disassembly, and cable and tie rod pulling tests.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption and stop-ring increases safety for the operator avoiding the over stroke of the piston.
- Equipped with high strength gaskets for maximum durability.
- 3/8" NPT female coupler with dust cap equipped and threaded section on the outer body of the cylinder.
- High strength head.
- External painting and Nitox ONC treatment on all mechanical components for maximum resistance against corrosion and wear up to 30 ton models. 60 ton and higher capacity models feature a Nitox ONC treatment on all mechanical parts.
- All models weighing more than 20 kg are equipped with lifting eyebolts.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

Cylinders for tensioning operations, maintenance and testing

CUSTOM CYLINDERS ON REQUEST

- Oil return hollow hydraulic cylinders, spring return, high pressure. Push force from 30 to 150 tons with range of strokes from 50 mm to 260 mm.
- Hydraulic cylinders with hollow center suitable for operations of tensioning, maintenance and testing; for cable tensioning operations, positioning bars in tensile structures, pulley assembly and disassembly, and cable and tie rod pulling tests.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption and stop-ring increases safety for the operator avoiding the over stroke of the piston.
- Equipped with high strength gaskets for maximum durability.
- 3/8" NPT female coupler with dust cap equipped and threaded section on the outer body of the cylinder.
- High strength head.
- External painting and Nitox ONC treatment on all internal mechanical components for maximum resistance against corrosion and wear up to 30 ton models. 60 ton and higher capacity models feature a Nitox ONC treatment on all mechanical parts.
- All models weighing more than 20 kg are equipped with lifting eyebolts.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

CUSTOM REACTION TOOLS**

Possibility of creating reaction bridges, custom spacers and specific equipment suitable for the installation on double acting hollow cylinders.

Series **CSE TU** | High tonnage cylinders, single acting, load return

PRODUCT PAGE

High tonnage

CUSTOM CYLINDERS ON REQUEST

- Single-acting high tonnage hydraulic cylinders with load return. Push force from 50 to 1000 tons with range of strokes from 50 mm to 300 mm.
- Plunger execution, equipped with stroke indicator and anti overstroke device.
- Hydraulic cylinders suitable for heavy duty applications, pushing and large lifting operations.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption.
- Equipped with high strength gaskets for maximum durability, 3/8" NPT female coupler with dust cap equipped.
- Removable high strength saddle and possibility of mounting a tilting saddle for better distribution of the load to be lifted.
- Nitox ONC treatment on all mechanical components for maximum resistance against corrosion and wear.
- All models are equipped with lifting eyebolts.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

Single acting cylinders with lock nut, low height for confined spaces

PRODUCT PAGE

High tonnage and confined area

CUSTOM CYLINDERS ON REQUEST

- High tonnage hydraulic cylinders with lock nut, reduced height, single acting. Push force from 60 to 500 tons with a range of strokes from 45 mm to 50 mm.
- Compact hydraulic cylinders, suitable for lifting operations pushing and heavy lifting. Lock nut for the maintenance of the load in complete safety.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption. Plugging execution, equipped with anti overstroke device.
- Equipped with high-strength gaskets for maximum durability.
- 3/8" NPT female coupler with dust cap equipped.
- Tilting saddle for optimal offset load distribution.
- Nitox ONC treatment on all mechanical components for maximum resistance against corrosion and wear.
- All models are equipped with lifting eyebolts.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

Single acting high tonnage cylinder, load return with lock nut

PRODUCT PAGE

High tonnage cylinders, lock nut, load return

CUSTOM CYLINDERS ON REQUEST

- High tonnage hydraulic cylinders, with lock nut, load return. Push force from 50 to 1000 ton, with range of strokes from 50 mm to 300 mm
- High tonnage hydraulic cylinders up to 3000 ton, suitable for heavy usage, lifting operations, pushing and heavy lifting.
- Plunger execution, equipped with stroke indicator and anti overstroke device.
- Lock nut for safe load upkeep. The threaded nut allows the locking and the mechanical upkeep of the load even for very long periods of time with disconnected pump. The operator then has the opportunity to work under raised load in complete safety.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption.
- 3/8" NPT female coupler with dust cap equipped.
- Removable high strength head and possibility of mounting a tilting saddle for better distribution of the load to be lifted.
- Nitox ONC treatment on all mechanical components for maximum resistance against corrosion and wear.
- All models are equipped with lifting eyebolts.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

Series **CRI GS TA** | High tonnage cylinder, with lock nut, oil return

PRODUCT PAGE

High tonnage lock nut with oil return

CUSTOM CYLINDERS ON REQUEST

- High tonnage hydraulic cylinders with lock nut, oil return, with rapid hydraulic return, high pressure. Push force from 30 to 600 tons with range of strokes from 50 mm to 300 mm on customer request.
- High tonnage hydraulic cylinders up to 3.000 ton, suitable for heavy usage, lifting operations, pushing and heavy lifting.
- Lock nut for safe load upkeep. The threaded nut allows the locking and the mechanical upkeep of the load even for very long periods of time with disconnected pump. The operator then has the opportunity to work under raised load in complete safety.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption and the stop ring increases safety for the operator avoiding the extra stroke of piston.
- Equipped with high-strength gaskets for maximum durability.
- 3/8" NPT female coupler with dust cap equipped.
- Integrated high strength tilting saddle for better distribution of the load to be lifted.
- Nitox ONC treatment on all mechanical components for maximum resistance against corrosion and wear.
- All models are equipped with lifting eyebolts.

High tonnage
Oil return

CUSTOM CYLINDERS ON REQUEST

- High tonnage hydraulic cylinders, double acting, oil return, high pressure. Push force from 30 to 1000 ton, with range of strokes from 160 mm to 330 mm.
- Extremely versatile hydraulic cylinders, hydraulic return allows shorter return times also in all conditions of usage, suitable for lifting operations and for heavy-duty applications.
- The guiding surfaces are sized to guarantee optimal performance in load offset absorption and the stop ring increases safety for the operator avoiding the extra stroke of piston. 10 % side load resistance .
- Equipped with high strength gaskets for maximum durability.
- 3/8" NPT female coupler with dust cap equipped.
- Removable high strength head and possibility of mounting a tilting saddle for better distribution of the load to be lifted.
- Nitox ONC treatment on all mechanical components for maximum resistance against corrosion and wear.
- All models are equipped with lifting eyebolts.
- Possibility to design and produce custom made hydraulic cylinders on request, with dedicated geometries, performances and features.

F.P.T. / HAND PUMPS

FROM 700 TO 4.000 bar

High pressure hand pumps produced in light aluminum alloy of aeronautics grade to minimize weight. Operating pressure from 700 to 4.000 bar.

Used in multiple fields of application, they represent an important tool, essential wherever there is no source of energy.

ALUMINUM ALLOY OF AERONAUTICS GRADE LIGHTWEIGHT AND EXTREMELY TOUGH

The use of this type of material reduces weights of the pump and the fatigue of the operator to their lowest increasing the handling and portability, even in environments that are difficult to reach. Designed to withstand critical conditions of work, fast and with low effort on the lever. The ideal tool.

CUSTOM HAND PUMPS ON CUSTOMER'S REQUEST

On request:

- Viton - Ethylene propylene special gaskets
- Various oil tank capacities available
- Customizable with additional relief valves.
- For hydrostatic tests with fluids different from oil.
- Dimensions, fixing holes, valve blocks to customer specification.

H₂O HAND PUMPS – WATER FLUID USE

FPT produces a range of hand pumps that can be used with water. This choice is a solution that protects the environment and can be used anywhere as the water is an eco-friendly fluid. It can therefore be operated in any environment. The H₂O series is very popular in laboratories for pressure testing, on-site tests and in all those situations where contamination with oil is not allowed.

PUMP CODE DESCRIPTION

The coding table of the hand pumps shows the various possibilities of range, choice of materials, type of drive and tank capacities available. This table, in addition to the request for costum pumps, may be useful to identify an F.P.T. hand pump in your possession and request spare parts or a new one.

PRODUCT PAGE

Compact and light weight

CUSTOM PUMPS ON REQUEST

- High pressure hand pumps manufactured in light alloy aluminum of aeronautical grade to minimize the weight.
- Single stage version with a maximum flow rate of 3 cc per stroke suitable for single acting applications.
- Pressure relief valve integrated in the pump body for maximum operator safety.
- High performance, low weight and excellent ergonomics.
- Integrated pressure gauge connection for direct assembly of measuring instrument.
- Oil filler cap with integrated breather. Tough pins with trough-holes for attachment to machinery or structures.
- Surface treatments to guarantee total reliability in the most difficult environments and maximum duration.

Series **PDSA** | Two speed hand pump aluminium

PRODUCT PAGE

For the maximum speed during operations

CUSTOM PUMPS ON REQUEST

- High pressure hand pumps manufactured in light alloy of aeronautical grade aluminum to minimize the weight.
- Two speed version first stage 40 cc flow rate for rapid approach and 3 cc at the second stage. For maximum speed during operations.
- Pressure relief valve integrated in the pump body for maximum operator safety.
- High performance, low weight and excellent ergonomics.
- Integrated pressure gauge connection for direct assembly of measuring instrument.
- Oil filler cap with integrated breather. Tough pins with trough-holes for attachment to machinery or structures.
- Surface treatments to guarantee total reliability in the most difficult environments and maximum duration.

Hand pumps for very high pressures: 1.600 - 3.000 - 4.000 bar, aluminium

PRODUCT PAGE

For very high pressure

CUSTOM PUMPS ON REQUEST

- High pressure hand pumps manufactured in light alloy of aeronautical grade aluminum to minimize the weight.
- Two-stage versions 1.600 bar and 3.000 bar with first stage 40 cc oilflow for rapid approach and second stage 0.5 and 1 cc. And 0.5 cc per stroke 4,000 bar single-stage version.
- Pump body integrated pressure relief valve for maximum operator safety.
- Very high pressure, high performance, reduced effort on the handle, excellent weight and ergonomics.
- Integrated pressure gauge connection for direct mounting of the measuring tool.
- Oil filler cap with integrated breather. Tough pins with trough-holes for attachment to machinery or structures.
- Surface treatments to guarantee total reliability in the most difficult environments and maximum duration.

F.P.T. / HYDRAULIC HAND PUMPS

Custom made hydraulic hand pumps

FPT production is able to satisfy particular needs not only in the choice of construction materials, but also in the type of fluid to be pumped. On request we can build non magnetic steel hand pumps for nuclear uses or for installation on military vehicles. Hand pumps that can be used with water, various types of phosphoric esters, naphtha and other hydrocarbons.

The operating pressure can reach up to 4.000 bar. The manual pumps can be made in single stage or double stage for greater speed during the phases of approaching the load. With reduced capacity tanks to be more compact or up to 8 liters to manage more cylinders contemporary.

F.P.T. / HYDRAULIC POWER UNIT & SYNCHRONOUS LIFTING SYSTEM

POWER UNIT'S PART CODE

F.P.T. hydraulic power units are designed and produced to adapt to various customers' needs. They are available in 4 different engine configurations: three-phase or single-phase electric motor, with gasoline engine and pneumatic motor. Pressure range available from 700 bar to 4,000 bar. The power units are equipped with pumps for different flow rates, either in the single-stage version or two-stage. They can mount a wide range of, manual, electric or pneumatic valves for single or double acting cylinders. In the standard configuration are available 10 liters tanks up to 60 liters ones and a very wide range of accessories.

TOTAL FLEXIBILITY IN THE CONFIGURATION

The FPT and FPT Split Flow series hydraulic pumps are designed to guarantee maximum flexibility in configurations. The customer can easily choose each single component of the power unit according to his needs and add or replace parts or accessories in a short time afterwards. Motors, pumps, valves and accessories are all modular ones and interchangeable with each other.

CUSTOM HYDRAULIC UNITS ON CUSTOMER'S REQUEST

On demand:

- High flow rates for advanced performance
- Larger tanks
- Hydraulic circuits for specific needs
- Custom layouts
- Custom electric panels
- PLC automation and programming
- Extreme applications:

offshore | arctic environments | desert environments | aggressive environments.

Series **FPT-MPU** | Portable hydraulic mini pumps

PRODUCT PAGE

Light and portable

CUSTOM HYDRAULIC PUMPS ON REQUEST

- Hydraulic mini pump, extremely light and compact, suitable for all applications where easy handling is a priority.
- **Only 12 kg weight to operate in any environment.**
- Maximum working pressure 700 bar.
- Single-phase electric motor 230V-50Hz, power 0.55 kW.
- Radial piston pump, double stage, suitable for heavy-duty applications.
- Available for simple and double acting applications.
- Electrically operated valves.
- Remote control as standard on all models.
- 2.1 liters resin tank.
- Metal cage with ergonomic handle.
- Available with pressure gauge and handwheel pressure regulator.
- GR-6F female quick coupling as standard on the outlets.

Maximum versatility and performance

CUSTOM HYDRAULIC PUMPS ON REQUEST

- The FPT model hydraulic pumps are the ideal solution for all industrial applications because of their extreme versatility and customization thanks to multiple configurations.
- Available with three-phase and single-phase electric motor or pneumatic.
- Possibility to install manual, electric or pneumatic, 3 or 4-way valves for single or double-acting cylinders and hydraulic equipment.
- With strong steel tank from 10 to 100 liters.
- Reduced maintenance. Designed to last.
- Wide range of accessories.
- Possibility to design and produce custom hydraulic pumps on request, with dedicated performance and features.
- Available models ATEX version. ▶

Always operative

CUSTOM HYDRAULIC PUMPS ON REQUEST

- The FPT-MS series power units are the ideal solution for all applications where it is not possible to connect electric or air supply.
- Equipped with 4-stroke petrol engine.
- Possibility to install manual, electric or pneumatic, 3 or 4-way valves for single or double-acting cylinders and hydraulic equipment.
- With strong steel tank from 10 to 100 liters.
- The whole series is equipped with a protective cage that simplifies transport and lifting and protects the hydraulic pump on construction sites.
- Wide range of accessories, supplied without quick couplers.
- Possibility to design and produce custom hydraulic pumps on request, with dedicated performance and features.

Valves for hydraulic pumps

MODEL	DRIVE	HYDRAULIC DIAGRAM	DESCRIPTION
PT	Manual		P-T Block (with pressure relief knob)
VM32	Manual		Manual valve for single acting cylinders (bypass knob) 3 way / 2 position
VM33	Manual		Manual valve for single acting cylinders 3 way / 3 position
VM43/VM43D	Manual		Manual valve for oil return cylinders 4 way / 3 position
VE32	Electric		Solenoid valve for single acting cylinders 3 way / 2 position
VE32A	Electric		Solenoid valve for single acting cylinders 3 way / 2 position for accessories

MODEL	DESCRIPTION	HYDRAULIC DIAGRAM	ASSEMBLE ON	DESCRIPTION
RP	Pilot operated check valve		VE43/VE43D – VM43/VM43D – VP43/VP43D – VM33	Dual Pilot Operated Check Valve consists of two checkers (both on A and on B) which ensure perfect load holding. Example: With a non pilot operated manual valve when switching from position A to the central hold position, a small pressure drop occurs due to the geometry of the valve: it is a very small leakage but in some cases it is not acceptable. The check valve helps to overcome this problem. It is required in split-flow pumps when no overcenter is equipped.

MODEL	DRIVE	HYDRAULIC DIAGRAM	DESCRIPTION

VP32A	Pneumatic		Pneumatic valve for single acting cylinders 3 way / 2 position for tools
VP33	Pneumatic		Pneumatic valve for single acting cylinders 3 way / 3 position
VP43/VP43D	Pneumatic		Pneumatic valve for oil return cylinders 4 way / 3 position

MODEL	DESCRIPTION	HYDRAULIC DIAGRAM	ASSEMBLE ON	DESCRIPTION
OC	Over-center valve		VE43/VE43D – VM43/VM43D – VP43/VP43D	The over-center valve (or counter-balance) has the purpose of controlling the movement of a hydraulic cylinder subject to negative loads. This valve can only be mounted on double acting or oil return cylinders. Without this valve, the return of the cylinder (during the descent phase) would not be controlled, seriously endangering the operator and the hydraulic system integrity. The valve is pre-calibrated at factory settings and the operator must not make any type of adjustment. The most economical alternative to the over center valve is a unidirectional flow regulator (RFUA). In this case the operator must completely close it before making the lifting and then gradually open it during the descent phase, varying the opening of the valve until the ideal speed is reached. It is clear that this last system is certainly cheaper but it puts the operator at risk due to possible mistakes. Moreover, in combination with the split-flow pump, the over-center valve provides a very high precision even during the return phase.

Accessories for FPT series
hydraulic pumps

Series **FPT**

The FPT series hydraulic pumps are the ideal solution for all industrial applications because of their maximum versatility and customization thanks to the multiple configurations and the many standard accessories with which they can be equipped.

PICTURE	CODE	NAME	DESCRIPTION
	DLOG	Data-logger	Device capable of recording time / pressure values for subsequent analysis. Data that can be imported into Excel via free FPT software.
	F	Oil filter on return	Recommended for harsh environments: it is important because it increases the life of hydraulic components.
	CP	Foot remote control	To switch on / off the motor and control the valve remotely, 5 meters long electric cable, foot control.
	CD	Remote control	To switch on / off the motor and control the valve remotely, 5 meters long electric cable.
	CDP	Pneumatic remote control	To switch on / off the motor and control the valve remotely, 5 meters long electric cable.
	RF	Unidirectional flow control valve	This valve allows the free flow of oil in one direction and intercepts it in the opposite direction when completely closed. When opened the flow is free in both directions.
	SC	Heat exchanger	This accessory reduces the heating of the oil, particularly suitable for heavy applications
	2U	2 outputs manifold	Manifold to use two cylinders, with integrated needle valves to control the flow of each line

PICTURE	CODE	NAME	DESCRIPTION
	4U	4 outputs manifold	Manifold to use four cylinders, with integrated needle valves to control the flow of each branch.
	G	Cage	Protection frame with wheels to facilitate the transport of the pump and protect it from accidental impacts.
	GR	Cage with wheels	Protection frame to facilitate the transport of the pump and protect it from accidental impacts.
	M100	Pressure gauge	Pressure gauge 0/1000 bar – Ø 100 mm – thread ½" GAS
	S0	No oil	Pump supplied with no oil
	C1	Quick coupler	No.1 Female coupler mod.GR6F – 3/8" NPT
	C2	Quick couplers	No.2 female couplers mod.GR6F – 3/8" NPT
	C4	Quick couplers	No.4 female couplers mod.GR6F – 3/8" NPT
	C8	Quick couplers	No.8 female couplers mod.GR6F – 3/8" NPT
	FRL	FR+L group	Compact group consisting of a filter to retain impurities from the pneumatic circuit, a regulator to allow adjustment of the pressurized air supply, lubricator to make the hydraulic pump work properly.

Configure your high pressure electric or air hydraulic pump.

Creating your own high pressure, 700 bar, electric or air hydraulic pump is extremely easy. FPT can make the model best suited to your applications. Choose the type of piston pump, the single phase or three phase electric motor, with 2 or 4 poles or pneumatic and the relative flow rate l / min.

Utilise different tank capacity, choose the type of valve that can have manual, pneumatic or electric actuation and the type of hydraulic cylinders that you want to operate. It is also available a wide range of accessories including remote control, return filter, one-way valve, quick couplings, cages, pressure gauges and manifolds.

F.P.T. / HYDRAULIC POWER UNIT

Series **FPT BATT** | Cordless battery hydraulic pumps

PRODUCT PAGE

Super light and portable

CUSTOM HYDRAULIC PUMPS ON REQUEST

- Battery powered pump for operating single acting cylinders and tools.
- Cordless Battery Hydraulic Pumps with double stage configuration to maximize efficiency during operations.
- Battery powered: light, portable and equipped with shoulder strap for maximum Handling.
- Start button is located on the handle for easy use.
- The battery is lithium ion. Battery and battery charger are accessories that can be ordered separately.
- The optimal temperature range is 15 ° C ÷ 40 ° C. The oil to be used is ISO VG-10 mineral hydraulic.

Series **PP-700/1.000** | Pneumohydraulic pumps 700 bar – 1.000 bar

PRODUCT PAGE

Easy and cheap

CUSTOM HYDRAULIC PUMPS ON REQUEST

- The control units PP700 and PP1000 are characterized by very compact dimensions.
- Maximum pressure 700 or 1000 bar.
- Made of high-strength technopolymers result light and transportable.
- 5 and 10 liter tanks available.
- Easy to operate by foot or by hand.
- To be connected to the compressed air line and at an operating pressure of 6 to 8 bar.
- Available models with single or double effect with 3 or 4 way directional valves.
- For maximum flexibility, available push-button panel for remote control and a wide range of accessories.

Series **PP** | Pneumo hydraulic pumps
1.500 to 4.000 bar

PRODUCT PAGE

For very high pressure

CUSTOM HYDRAULIC PUMPS ON REQUEST

- PP series power units are the ideal solution for all very high pressure applications where it is necessary to connect to the compressed air line.
- Power units for tensioning bolts, burst tests, laboratory tests, scaling or keying of bearings, actuation of hydraulic bolt tensioners or hydraulic nuts and wherever high pressure is required.
- Standard versions with pressure 1500 bar - 2500 bar - 3000 bar and 4000 bar.
- Equipped with pressure relief valve for maximum operational safety.
- Handwheel pressure regulator valve.
- Pressure gauge, female quick coupler and standard pneumatic filter regulator assembly on all models.
- Models available with remote control pendant (CDP).
- Possibility to design and produce custom hydraulic power units on request, with dedicated performance and features.

Series **FPT GEO** | Pump for tests and geotechnics

PRODUCT PAGE

For automatic pressure recovery

CUSTOM HYDRAULIC PUMPS ON REQUEST

- The most reliable method for determining bearing capacity of a pole is to subject it to a load test. This means planting the pile to the project depth and applying a succession of loads to it.
- FPT GEO series power units perfectly accomplish this task ensuring the maintenance of the pre-set load.
- With the practical microprocessor display it is possible to set the desired pressure. The pump will maintain this value, restoring it in case of leaks or yielding.
- Available with three-phase or single-phase electric motor.
- Protective cage with integrated electrical panel and eyelets for lifting, 20 and 40 liters tank capacity.
- Possibility to design and produce custom hydraulic pumps on request, with dedicated performance and features.
- For years F.P.T. cares of the environment and its protection. It has in fact various products suitable for use with water or fluids 100% biodegradable.

**FPT – TECH Series
HYDRAULIC PUMPS FOR TESTS
AND PRESSING TESTS**

More and more customers need to have a technologically advanced product to perform pressure tests. F.P.T. realizes for this specific sector those power units suitable for operations with water or biodegradable fluids, able of perform pressure tests, record data and be remotely controlled.

Equipped with PLC and dedicated FPT software, they are the ideal tool for all testing and product validation and are completely customizable based on specific customer needs.

Series **FPT SPLIT FLOW** | Hydraulic pump with independent outlets

PRODUCT PAGE

For synchronous lifting

CUSTOM HYDRAULIC PUMPS ON REQUEST

- Split Flow power units allow to perform synchronous lifting and lowering operations of irregular and unbalanced loads.
- Can handle 2 - 4 - 6 and 8 single or double effect cylinders.
- Piston pump with independent outputs ideal for carrying on lifting operations where high accuracy load leveling is required.
- $\pm 3\%$ accuracy on the nominal stroke when lifting with single-acting cylinders and during lifting and lowering with double-acting cylinders.
- Available manual or electric valves with related control pendant and counter-balance valves for load control during descent.
- The split flow hydraulic pumps have tanks from 10 to 150 liters and allow to operate a wide range of medium and high tonnage cylinders. It finds its ideal use in large lifts, in infrastructural construction, heavy carpentry and in industry and in all sectors where there is a need to manage a load.

Series
F.P.T. SYNCHRO | Synchronous lifting system

PRODUCT
PAGE

For fully automatic and safe operations in handling a load.

Lifting with a precision of 1 mm

F.P.T. manufactures integrated lifting systems controlled by PLC. The F.P.T. SYNCHRO allows the operator to carry out each step of the lifting and descending process synchronously through integrated management of the hydraulic and control part. Unbalanced loads are kept levelled during the up or down phases, with leveling accuracy equal to 1 mm.

The system was developed to adapt to customer lifting needs and can be totally customizable with a series of optional. It is the ideal tool for operations of lifting or weighing that need accurate control's systems functions. The F.P.T. system is user friendly, safe and modular.

Typical application of synchronous lifting from 4 to 48 points:

Thanks to stroke and pressure transducers feedbacks,

the system allows lifting and lowering in a synchronous way with the precision of 1 mm, reducing the risk of excessive stress due to unbalanced distribution of the loads between the lifting points.

The operator can set on the PC screen the parameters of the operation to be performed, decide the number of cylinders to use, the stroke, the accuracy and the speed to operate. All data during operations are always monitored by the system increasing productivity and safety during operations. All data are stored and can be downloaded later.

Basic system composition:

- 700 bar hydraulic pump with radial piston pump, three-phase motor inverter controlled
- laptop or touch screen panel
- wire transducers for stroke control
- armored cables complete with industrial connectors

For use with single or double acting hydraulic cylinders.

Controls - Operator panel:

- Monitoring from 4 to 48 lifting points.
- Controlled movement for lifting / lowering.
- Possibility to select the cylinders to be operated.
- 2 modes available: automatic or manual.
- Possibility to set the maximum lag permitted.
- Accuracy on synchronism of 1 mm.
- Load and stroke alarm display for maximum safety during operations.
- Display of the maximum relative error between various cylinders.
- Download and storage of data related to lifting.

Speed optimization

The system is able to optimize the speed of load lifting / lowering regardless of number and size of cylinders maintaining the error within the set limit. The operator panel also allows the approach of the cylinders to the structure/formwork to lift, thus allowing a considerable saving of time.

The information displayed for each cylinder are:

- relative and absolute position
- pressure
- force
- direction (upward / downward)
- information relating to errors

Optionals available:

- Rotation on synchro
- Center of gravity - COG

Typical synchronized applications:

- Handling of heavy structures.
- Maintenance, launch or construction of bridges
- Load transfer operations
- Installation or maintenance of heavy systems
- Positioning of offshore platforms
- Weighing operations

The ideal system for heavy and critical lifting jobs and for weighing operations – where are needed delicate control operations without manual control. Unbalanced loads are automatically kept leveled during the lifting or the lowering phases, with an accuracy of 1 mm.

- Easy and intuitive interface
- All operations can be performed automatically from the PC - no manual operation
- Siemens PLC
- Errors and alarms in case of anomalies or out-of-parameter operations

Pressure gauge adaptors

The FPT system can be used to mount the pressure gauge directly on the pump head. The pressure gauge adaptors are required on pumps and valves when the pressure gauge is not directly installed.

High pressure hoses

CUSTOM FLEX HOSES ON REQUEST

The 1000 bar thermoplastic flex hoses standard 1/4 version with internal Ø 6.3 mm are suitable for demanding applications and have a safety factor of 2.8: 1. On request, also available hoses with custom sizes and fittings, flexible hoses with internal Ø of 9.7 mm for applications with high flow rates as well.

For very high pressure applications, thermoplastic hoses available in a range from 1.800 to 4.000 bar to cover all market needs.

CUSTOM VALVES ON REQUEST

- Used to connect multiple lines to one inlet.
- Built with radial or linear outlet. The linear models are supplied with a pressure gauge installation hole.
- Available in 11 standard models and in custom versions for high pressure jobs.
- From 700 to 4.000 bar

CUSTOM HYDRAULIC BOLT TENSIONERS

F.P.T. can provide custom design bolt tightening solutions from 700 to 2.500 bar. The relevant markets more and more require hydraulic bolt tensioners built to the customer's to specifics operate within the required geometry. F.P.T. supports customers from studying the layout to the 3D model and the production of the requested tensioners.

F.P.T. doesn't just produce tensioners, but also supports the customer in developing the hydraulic circuit, providing the hydraulic pumps and all the components needed to get the system running.

- Tensioning accuracy. The tensioner, by applying a direct force on the stud, allows very high accurate tightening, directly proportional to the pressure applied to the tensioner itself.
- Easy calculation of the force to be applied to the stud. The calculation of force is simple and F.P.T. provides all the force / pressure conversion data.
- Speed and repeatability in tightening operations. Easy to set up and fast in carrying out the tensioning operation, guaranteeing very high repetitiveness as well.
- Less stress. By this tightening method the studs are less stressed because there are no torsional forces, just axial ones.

Series **TTS** | Standard hydraulic bolt tensioners

PRODUCT
PAGE

High forces – reduced dimensions: anti over-stroke device.

CUSTOM TENSIONERS ON REQUEST

• TTS Series tensioners are designed to suit most flanges type: ANSI B16.5 - ANSI B16.47 - B.S.3293 - AWWA - MSS-SP44 - API-6A - API-17D - UNI EN 1092-1.

• High forces and reduced dimensions. TTS Series tensioners represent the optimal combination between the developed strength and their size.

• Extremely compact dimensions and low weight. In TTS series the spaces for the installation are reduced to a minimum level and operations are facilitated by reduced weights.

• Maximum flexibility. With only 6 hydraulic cells the operator can cover an extended range of Imperial or Metric thread sizes from 3/4" to 4" (M20 – M100).

• 15 mm stroke cover most of the tensioning application. If longer strokes are required the tensioning operation can be carried on by steps.

• All components are manufactured with hardened high tensile strength steel.

• Special treatment to guarantee: high resistance to corrosion - high resistance to wear – extremely low friction to help during screw operations.

• Safety is a must. All size have over stroke indicators.

• All model are equipped with 2 quick couplers, male and female, for serial hydraulic connection.

• Special high quality seals for leak free operations and easy maintenance.

PRODUCT
PAGE

For big sizes

CUSTOM TENSIONERS ON REQUEST

The hydraulic bolt tensioners with threaded insert are characterised by the threaded interchangeable insert which makes it possible to work on studs with various threads, using just one hydraulic cell.

This configuration is extremely versatile whenever stud with different threads and similar clearance must be tensioned, all you need is a set of inserts different sockets and in some cases reaction bridges.

F.P.T. is specialized in the study and production of custom hydraulic bolt tensioners from 700 to 2,500 bar.

PRODUCT
PAGE

To be compact

CUSTOM TENSIONERS ON REQUEST

The compact hydraulic bolt tensioners have the thread integrated in the piston.

This characteristic reduces the overall size at a minimum level, allowing you to have a tensioner with extremely small dimensions and to be able to operate where other tensioners could not be installed.

F.P.T. produces this model of tensioner, with threaded piston, in all those cases in which it is not possible to meet the requirements of dimensions without recurring to multistage tensioner.

Spring return version or pneumatic return can be realised to speed up the return operations of the piston.

Series **CTP-M** | Multi-stage hydraulic bolt tensioners

PRODUCT
PAGE

High forces, low clearance

CUSTOM TENSIONERS ON REQUEST

The CTP-M series is characterised by a central puller which two loading cells operate on, this construction makes it possible to double the load capacity whilst keeping the external cell dimension the same. The results obtained are very tight clearances with the load supplied remaining equal.

The multistage tensioners F.P.T. are suitable for all applications where there are reduced radial dimensions available.

This type of tensioner is available also in the version with gear rotation nut mechanism to accelerate tensioning operations. Also there is the possibility of shaping the bridge to best match the available space among nuts.

F.P.T. realizes multistage hydraulic bolt tensioners according to customer specifications by carrying out a preliminary study on the existing dimensions and thus offering the most suitable solution.

Hydraulic bolt tensioners for the wind turbine sector | Series **CTP-W**

PRODUCT
PAGE

For wind and renewables

CUSTOM TENSIONERS ON REQUEST

F.P.T. - Fluid Power Technology produces a wide range of wind tensioners, CTP-W series, specifically designed for the wind power sector, for bolted joints of a wind turbine. Extremely compact, they are capable of developing very high forces, designed and engineered for turbine installation and subsequent maintenance.

They have a compact structure, equipped with a piston, spring return and / bush screwing / unscrewing nut device on the stud with ratchet wrench. Equipped with adjustable joint for 360° rotation to place the flexible hoses in the best possible position in order to allow the free access to tensioning tools. Automatic piston return system for maximum speed in operations, nut unscrewing/screwing system and the assisted key positioning equipped.

The wind tensioners are especially designed to tighten swivel ring, bolts, hub and blades of wind towers. They are light, easy to use, easy to handle and carefully designed for greater reliability and durability.

All components are made of high resistance steel and have a special treatment to guarantee a high resistance against corrosion and a high resistance to wear during screwing operations and equipped with Long Life Time Puller.

Hand pumps for bolt tensioners and hydraulic nuts 1.600 - 3.000 bar, aluminium made

PRODUCT
PAGE

**For bolt tensioners
and hydraulic nuts**

CUSTOM PUMPS ON REQUEST

- Very high pressure hand pumps produced in light-weight aluminum alloy of aeronautics grade to reduce weight to a minimum level. The most flexible solution for driving hydraulic bolt tensioners and nuts.
- Two-stage versions at 1,600 bar and 3,000 bar with 40 cc displacement at the first stage for a rapid approach and 1 cc at the second stage.
- Pressure relief valve integrated in the pump body for maximum operator safety.
- Very high pressure, high performance, reduced effort on the handle and ergonomics.
- Integrated pressure gauge connection for direct mounting of the measuring instrument.
- Oil filler cap with integrated breather. Tough pins with trough-holes for attachment to machinery or structures.
- Surface treatments to guarantee total reliability in the most difficult environments and maximum duration.

- Single-phase electric power pack suitable to operate hydraulic bolt tensioners and nuts.
- On request different engines, capacities and pressure are available.
- The electric pump is available in three versions: 1.500 - 2.000 and 3.000 bar.
- The pressure regulating valve allows easy output pressure setting.
- Control pendant for easy operation control.
- Data Logger option available as an option, for the download of tightening values.

CUSTOM PUMPS ON REQUEST

- PP series power packs are the ideal solution for all very high pressure applications when compressed air line connection is needed.
- Hydraulic pumps for stud tensioning, burst tests, laboratory tests, scaling or keying of bearings, actuation of hydraulic bolt tensioners or hydraulic nuts and wherever high pressure is required.
- Standard versions with pressure 1500 bar - 2500 bar - 3000 bar and 4000 bar.
- Equipped with pressure relief valve for maximum operative safety.
- Handwheel pressure regulator valve.
- Pressure gauge, female quick coupler and standard assembly pneumatic regulator filter on all models.
- Models available with remote control pendant.
- Possibility to design and produce custom hydraulic power units on request, with dedicated performance and features.

Series **FPT-MPU-HTW** | Portable mini pumps for hydraulic torque wrenches

PRODUCT
PAGE

To be carried everywhere

CUSTOM PUMPS ON REQUEST

- Portable mini pump, extremely light and compact, suitable for using all small and medium sized torque wrenches.
- **Only 12 kg weight to operate in any environment.**
- Maximum working pressure pressure 700 bar.
- Single-phase electric motor 230V-50Hz, power 0.55 kW.
- Radial piston pump, double stage, suitable for heavy-duty applications.
- 2.1 liter resin tank.
- Metal cage with ergonomic handle.
- Pressure gauge and valve handwheel pressure regulator as standard.
- GR-1 quick coupling as standard on the outports.

To stay light
and compact

CUSTOM PUMPS ON REQUEST

- The FPT-HTW-C is a compact pump that provide the power for your torque wrenches.
- The FPT-HTW-C10 Series is available in both single port models for single tool operation and quad port models for running up to four tools simultaneously.
- The sight glasses enable operator to monitor reservoir oil levels and the transport cage for all around protection and easy handling.
- The hydraulic pump is available in electric or pneumatic version, with different 2-Stage delivery.
- For this model are available different accessories. For both version the heat exchanger, quick couplers and twin hoses, for FPT9-HTW-C10 the quad block and the auto cycle - for automatic operation. It is also possible totally customize the pump up to the customers' needs.

When is needed a
very high flow

CUSTOM PUMPS ON REQUEST

- The pump FPT-HTW-HF is a high flow version typically used for intensive job with multiple tools.
- The pump is available on three-phase version with 15 l/min at 100 bar and 3 l/min at 700 bar.
- The pump is equipped with protection cage and wheels for easy handling.
- Standard for this model are: heater exchanger, quad block manifold and oil return filter.
- There are also available different accessories: automatic cycle, quick couplers and twin hoses.
- The FPT-HTW-HF can also be equipped with different pumps and flow related to the torque specifications.
- Automatic cycle available for heavy duty operations.

Hydraulic nuts

CUSTOM PUMPS ON REQUEST

- Hydraulic nuts are used in all those applications where it is not possible to use a mechanical nut because of continuous maintenance operations, heat, vibrations or other factors.
- Replace existing hex nuts to provide an accurate and uniform load at every bolted connection.
- Allow to tighten large diameter bolts, with high and precise preloads easily.
- They can have upper or lower clamping collar and they are extremely compact, it is also possible to connect any number of hydraulic nuts for simultaneous operation, ensuring a uniform tensioning.
- The hydraulic nuts are used for installation and removal of components such as couplings, gears and ship propellers, rudder blades, rudder blade shaft coupling or large pieces on conical seats and for bearings assembling and disassembling.
- The hydraulic nuts can have various threads and dimensions, they are operated by a handpump or high pressure hydraulic pump. Customized solutions produced on request.
- They find application in the naval, iron and steel, mechanical sector.

To remove your nuts

CUSTOM TOOLS ON REQUEST

- Used when nuts are difficult to remove due to rust or wear.
- Equipped with fixed and mobile blades to cut the nut in a single operation: the blades can be sharpened or replaced.
- Used in the petrochemical, railway and nautical sectors.

SAFETY INSTRUCTIONS

- Can be used on hexagonal nuts with hardness under 44 HRC
- During the cutting phase, position the blade to the centre of the surface to cut
- Avoid touching the washer if present

Replacement of damaged nuts – Industrial Clamping

CUSTOM TOOLS ON REQUEST

- FPT is a producer of Hot Bolt and Industrial Clamping System with applications throughout the industrial sectors, oil & gas as well.

- The system has been designed to remove rusted nuts on pipelines where it is essential to replace the corroded or damaged nuts without interrupting production.

- The standard system consists of 4 FPTs Hot Bolt of 34 kN with a 10 mm stroke and a maximum working pressure of 700 bar, an FPT hand pump model PMSA2, manifold, flex hoses, couplings and accessories. Every Hot Bolt is superficially treated to obtain an excellent resistance against corrosion. Product code: KIT-4HBRC-35

- The tools can be operated through multiple outputs: electric power unit, pneumo-hydraulic pumps and handpumps and the system can be personalized to meet customer's requirements.

Series **HEAS** | Tightening tool for plate heat exchangers

Assembly and disassembly system for plate heat exchangers

PRODUCT PAGE

- Tightening tool for plate heat exchangers, FPT code: HEAS is our assembly and disassembly system to perform opening and closing procedure on the exchangers.
- Precise, compact and light weight system for assembly and disassembly plate heat exchangers
- The best solution for customers with a variety of heat exchanger model sizes
- Aluminium hollow cylinders, open bridge and electric hydraulic pump to control 4 cylinders
- Full set of split nut, hex adapter and bushes

CUSTOM TOOLS ON REQUEST

F.P.T. / SAFETY INSTRUCTIONS

All F.P.T. products are designed and built in full compliance with the international regulations regarding occupational safety. The following are some general guidelines regarding the correct and improper use of F.P.T. products. Before using any F.P.T. equipment carefully read the user and maintenance manuals available to download at www.fpt.it. Before operating equipment, always wear the required protective clothing. F.P.T. cannot be held liable for damage or injuries caused by the improper use of products or lack of maintenance. For any clarification or technical information, please contact F.P.T. The capacity and stroke values supplied by the manufacturer are the recommended ceiling values to ensure safety. It is recommended not to exceed 80% of these values.

The measurements and technical data provided are correct and verified at the time of printing. In any case, F.P.T. reserves the right to make any changes whatsoever to the products in this catalogue without notification. Because the products are constantly being developed, any of the information in this catalogue may be changed without notification. Please contact the F.P.T. technical office for further information if the final measurements are important.

Cylinders must be stably positioned on smooth and even surfaces.

Loads must be mechanically secured, and never work underneath those loads.

The anchor/support point of the load must be stable and centered along the cylinder's axis.

Do not expose equipment to heat sources or welding irradiation heating higher than 65°.

Maintenance operations must be carried out only when equipment is not under pressure. Do not disconnect joints under pressure. Never pressurize a semi coupler.

By means of a pressure gauge, check that the operating pressure does not exceed the rated pressure value indicated for that component.

Do not use extensions on the pump handle or other tools on the manual controls of the valves.

Keeping equipment clean and tidy will help save money on maintenance expenses.

Clean fittings before installing them in cylinders: foreign matter may enter the hydraulic system and damage its most delicate components.

Do not overbend hoses and protect them against flattening.

F.P.T. / WARRANTY

F.P.T. products are warranted to be free of defects in workmanship under normal use for as long as they are owned by the original purchaser.

a product is defective, the product must be delivered to F.P.T. which, in its unquestionable judgement, if it deems the product to be defective, will be repaired or replaced under this warranty. The customer must pay for any and all expenses for transporting the product to/from F.P.T.

This warranty does not cover incorrect installation or use of the products, inadequate maintenance, alterations or repairs not authorized by F.P.T. or damage caused by transportation. All electric parts, motors, solenoid valves and in general all parts not supplied by F.P.T. are excluded from this warranty. Such items are warranted to the extent of the warranty provided by the manufacturers of such items.

F.P.T. will not be held liable for:

- any damage caused by defective or non-conforming products, negligence or any other damage
- any other obligations or liabilities arising out of breach of contract or of warranty. The warranty will not be applicable for non-payment (or even partial payment) of the goods supplied.

The warranty is limited only to new, original equipment products. If the customer believes

CE of conformity

F.P.T. supplies a declaration of conformity for each product and the CE mark for the products that comply with the directives of the European Community.
